THE PERFECTION
TO YOUR ROUTINE

Over the last 50 years, National, World and Olympic champions have skated to victory on industry leading, John Wilson blades. They've appreciated the precision and attention-to-detail that goes into creating every single edge. The results of which have set John Wilson apart in strength, flexibility, resistance to corrosion, and, of course, medal tally.

From laser-cut steel to a meticulous six-stage tempering process, the careful combination of surface treatments and coatings to the master craftsmen who hand-finish each blade, every millimetre is perfected to ensure stability and excellence on the ice. John Wilson creates an edge that will not only withstand the rigours of competition skating, but is designed to help advance it.

Evgenia Medvedeva's decision to use John Wilson Blades should come as no surprise – these are the champion's choice.

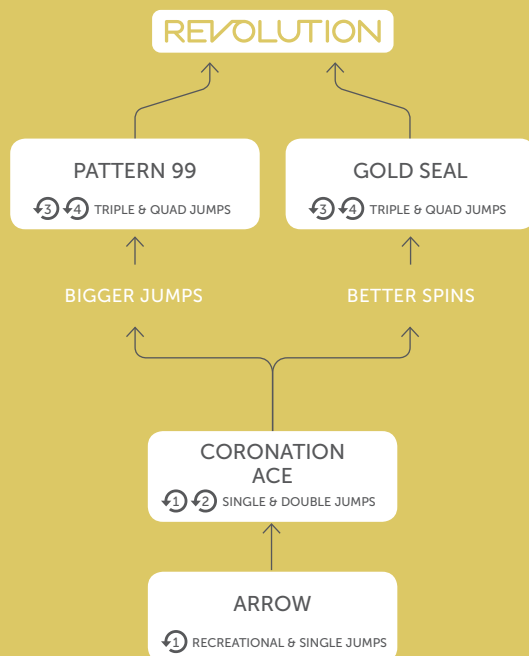

Coming onto the senior circuit in 2015, Medvedeva has put together an impressive resume, carving up the competition with icy-cool consistency. She's broken World Records for the highest-scoring ladies' free skate and developed an uncanny ability to execute difficult technical elements. In addition to her impressive artistic interpretation and long lines, her jumping prowess is unrivalled – particularly her ability to nail them with Tano variation. With one Junior and two Senior World Championship titles under her belt, she continues to perfect her routines. There's a reason Medvedeva's blades are named Gold Seal – they've won more medals than any other blade on the market today!

ARROW

Perfection for your first steps.

The John Wilson Arrow blade was designed in 2015 to meet the exact needs of the entry level skater. With a flatter profile than most beginner blades, the rocker is perfectly suited for boot/blade combination sets. More stability on the ice equates to a better learning experience and lightweight means less fatigue. This affordable blade delivers maximum performance. Made of 1075 carbon steel, you will be hard-pressed to find better value.

RECREATIONAL AND SINGLE JUMPS

CORONATION DANCE

Synchronized to your needs.

The Coronation Dance is John Wilson's premier dance and synchronized skating option. This blade has a shorter heel to avoid clashing during Mohawks and Choctaws and will also eliminate any unnecessary trip-ups while synchro teams perform in tight formations. The coarse cross-cut picks are widely popular and are identical to the Coronation Ace toe picks which give this blade a lot of versatility as the demands of both dance and synchronized skating continue to develop.

PARABOLIC

CORONATION ACE

The most popular freestyle blade in the world.

No other blade on the market can match the legendary performance and value of this fantastic blade. A skater moving up in skill will appreciate the responsiveness of the 7 ft rocker profile and, due to its coarse cross-cut tooth configuration, this option is highly recommended by international coaches for its reliability when learning new components. It is precision hardened to offer a strong skating edge and was used by many Olympic, World and National Champions early in their careers. If you are leaving a boot/blade combination set and plan on developing your axel and double jumps, this is our recommended option.

So it's easier for you to perfect yours.

PATTERN 99

Often imitated, never equalled.

The Pattern 99 blade is no stranger to the podium. It is one of the most popular profiles in the world as it consistently delivers maximum performance to high-end freestyle skaters. The primary 8 ft radius works wonderfully for Japanese sensation Shoma Uno who uses the Pattern 99's tapered top toe pick for precision toe spotting on explosive jumps. This blade is 'the real McCoy' – it's not comparable to anything, it's not similar to anything, it's the original. If you're emerging as an elite level skater with powerful jumps and seek more control by being lower to the ice, this blade is undoubtedly your best option in our range – just ask our very own Shoma Uno.

GOLD SEAL

Named for a reason.

The Gold Seal blade won more Gold Medals than any other model at Sochi 2014. Coincidence? We think not. Perhaps the most widely recommended blade by Russian coaches, this blade delivers for freestyle and pairs skaters seeking an optimal spinning experience. Due to its higher heel stanchion, unique compound radius and tapered/hollow ground features, skaters report experiencing effortless spins and control in their footwork sequences and edge jumps. Trusted and worn by Evgenia Medvedeva.

PARABOLIC BLADE
TECHNOLOGY
MAXIMIZES EVERY
SINGLE ONE

PARABOLIC

The unique curvature of a Parabolic blade enables it to bite deeper into the ice. This means smoother, sharper and more energetic spins, turns and edge work no matter what level you're skating at. And, as your weight is centered due to precision geometry, you have increased levels of control and confidence to maximize your true potential.

REVOLUTION

FOR

TOTAL PERFECTION

APPLY REVOLUTION
TECHNOLOGY TO OUR
PRECISION BLADES

Revolution is the pinnacle in blade technology, combining the traditional merits of a steel blade alongside the benefits of weight reduction and flexibility through the use of carbon fibre.

The results are unparalleled. The fusion of old and new technology allows skaters to move across the ice at increased speeds, make higher jumps, and cushion-land them, with greater control to reduce the risk of injury.
